

Diesel Generator Set

MTU 20V4000 DS3600

3.3 - 11 kV/50 Hz/prime power/fuel consumption optimized 20V4000G44F/water charge air cooling

Optional equipment and finishing shown. Standard may vary.

Product highlights

Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals

Support

- Global product support offered

Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

Power rating

- System ratings: 3380 kVA 3390 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

Performance assurance certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 75% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

Complete range of accessories available

- Control panel
- Power panel
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Electrical driven radiators
- Medium and oversized voltage alternators

Emissions

Fuel consumption optimized

Certifications

- CE certification option
- Unit certificate acc. to BDEW (German Grid-Code) on request

Application data 1)

Engine			Liquid capacity (lubrication)	
Manufacturer		MTU	Total oil system capacity: l	390
Model	20V	4000G44F	Engine jacket water capacity: l	260
Type		4-cycle	Intercooler coolant capacity: I	50
Arrangement		20V		
Displacement: I		95.4	Combustion air requirements	
Bore: mm		170	Combustion air volume: m³/s	4.0
Stroke: mm		210	Max. air intake restriction: mbar	30
Compression ratio		16.4		
Rated speed: rpm		1500	Cooling/radiator system	
Engine governor		ECU 9	Coolant flow rate (HT circuit): m3/hr	80
Max power: kWm		2807	Coolant flow rate (LT circuit): m3/hr	44
Air cleaner		Dry	Heat rejection to coolant: kW (100/110%)	945/1090
			Heat radiated to charge air cooling: kW (100/110%)	700/795
Fuel system			Heat radiated to ambient: kW	105
Maximum fuel lift: m		5	Fan power for electr. radiator (40°C): kW	105
Total fuel flow: I/min		27		
			Exhaust system	
Fuel consumption 2)	l/hr	g/kwh	Exhaust gas temp. (after engine, max.): °C	550
At 100% of power rating:	653	193	Exhaust gas temp. (before turbocharger): °C	605
At 75% of power rating:	485	191	Exhaust gas volume: m3/s	9.6
At 50% of power rating:	349	206	Maximum allowable back pressure: mbar	50
			Minimum allowable back pressure: mbar	-

Standard and optional features

System ratings (kW/kVA)

Generator model	Valtana	NEA (ORDE) optimized			
Generator modet	Voltage		without radiator	without radiator

^{*} cos phi = 0.8

All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

² Emission optimized data refer to TA-Luft optimized and NEA (ORDE) optimized/Tier 2 compliant engines.

³ Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

Standard and optional features

Engine

■ Closed crankcase ventilation ■ Standard single stage air filter ■ Governor-electronic isochronous ■ Oil drain extension & shut-off valve ■ Common rail fuel injection		■ Fuel consumption optimized engine
Generator		
 4 pole three-phase synchronous generator Brushless, self-excited, self-regulating, self-ventilated Digital voltage regulator Anti condensation heater Stator winding Y-connected, accessible neutral (brought out) Protection IP23 	 Insulation class H, utilization acc. to H Radio suppression EN55011, group 1, cl. B Short circuit capability 3xln for 10sec Winding and bearing RTDs (without monitoring) Excitation by AREP + PMI Mounting of CT's: 3x 2 core CT's Winding pitch: 5/6 winding Voltage setpoint adjustment ± 5% 	 Meets NEMA MG-1, BS 5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS1359 and ISO 8528 requirements Leroy Somer medium voltage generator Marathon medium voltage generator Oversized generator
Cooling system		
Jacket water pumpThermostat(s)Water charge air cooling	☐ Electrical driven front-end cooler☐ Jacket water heater☐ Pulley for fan drive	
Control panel		
Pre-wired control cabinet for easy application of customized controller (V1+) Island operation (V2) Automatic mains failure operation with ATS (V3a) Automatic mains failure operation incl. control of generator and mains breaker (V3b) Island parallel operation of multiple gensets (V4) Automatic mains failure operation of multiple gensets (V4) Island parallel operation of multiple gensets (V5) Island parallel operation of multiple gensets (V7) Island parallel operation of multiple gensets (V7) Island operation of multiple gensets (V7) I		 Multilingual capability Multiple programmable contact inputs Multiple contact outputs Event recording IP 54 front panel rating with integrated gasket Remote annunciator Daytank control Generator winding temperature monitoring Generator bearing temperature monitoring Modbus TCP-IP
Power panel		
□ Available in 600x600 mm □ Supply for battery charger □ Phase monitoring relay 230V/400V □ Supply for jacket water heater		 Supply for anti condensation heating Plug socket cabinet for 230V compatible Euro/USA

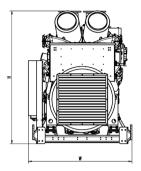

Represents standard features

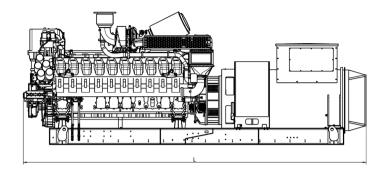

☐ Represents optional features

Standard and optional features

Fuel system		
 Flexible fuel connectors mounted to base frame Fuel filter with water separator Fuel filter with water separator heavy-duty 	 Switchable fuel filter with water separator Switchable fuel filter with water separator heavy-duty Seperate fuel cooler 	☐ Fuel cooler integrated into cooling equipment
Starting/charging system		
■ 24V starter	 Starter batteries, cables, rack, disconnect switch 	☐ Battery charger ☐ Redundant starter 2x 15kW
Mounting system		
■ Welded base frame	Resilient engine and generator mounting	■ Modular base frame design
Exhaust system		
Exhaust bellows with connection flangeExhaust silencer with 10 dB(A) sound attenuation	Exhaust silencer with30 dB(A) sound attenuation	Exhaust silencer with40 dB(A) sound attenuationY-connection-pipe

Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System	Dimensions (LxWxH)	Weight (dry/less tank)
Open power unit (OPU)	6249 x 1887 x 2412 mm	18420 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

Sound data

Consult your local MTU distributor for sound data.

Emissions data

Consult your local MTU distributor for emissions data.

Rating definitions and conditions

- Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789. Average load factor: ≤ 75%.
- Consult your local MTU distributor for derating information.
